Thuraya XT-PRO DUAL
Dual mode. Dual SIM.

THURAYA 
stay close

Two worlds in one

At Thuraya, innovation never stops. The Thuraya XT-PRO DUAL is the world's first dual-mode, dual-SIM phone, bridging the gap between satellite and terrestrial communications. By using both a satellite SIM card and a GSM SIM card, you can now move in and out of terrestrial coverage with ease, enjoying connectivity no matter where you are.

Highly ruggedized with a shockproof, water and dust resistant body, the XT-PRO DUAL also comes with advanced navigation capabilities through GPS, BeiDou, Glonass and Galileo for the highest flexibility in all regions.

No matter where you are or how remote your location, we keep you connected. Thuraya's comprehensive satellite network provides reliable, clear and uninterrupted communications in more than 160 countries across Europe, Africa, Asia and Australia; and in GSM-mode the phone supports most 2G/3G frequencies across the world.

Convergence
you can
customize

The **Always On** capability of the XT-PRO DUAL allows the phone to work in satellite and GSM-mode simultaneously. This lets you to make calls seamlessly and ensures you are always reachable on both networks.

For a true **dual active** experience, you can be contacted on your GSM number even while on an active satellite call - and vice versa.

This unique dual-mode concept offers full flexibility. You can choose the setting that is best and most convenient for you.

The XT-PRO DUAL has a dedicated SIM slot for satellite communications and a second one for GSM communications. You can use a Thuraya SIM card and a GSM SIM card, or choose any combination of SIM cards that meets your requirements.

Product features

Dual mode. Dual SIM.

Communicate seamlessly in satellite and GSM mode: the world's first phone to combine dual-mode and dual-SIM, the Thuraya XT-PRO DUAL has two SIM card slots for complete flexibility and choice.

SAT and GSM "Always On"

Make and receive calls simultaneously on both networks with the XT-PRO DUAL's unique SAT and GSM "Always On" function.

Advanced navigation capabilities

Select your preferred navigation system and choose between GPS, BeiDou, Glonass and Galileo for the highest flexibility in all regions. Your XT-PRO DUAL can then be used to send your coordinates to pre-defined numbers via SMS, or email, based on preset time intervals, distance travelled or movement beyond your preset geofence.

Most powerful battery

Equipped with a long lasting battery, the XT-PRO DUAL has a talk-time of up to 11 hours and a standby time of up to 100 hours, enabling reliable communications whenever you need them across an extended period. The status indicator gives you accurate readings with the remaining battery percentage indicated in 1% intervals.

Glare resistant Gorilla® glass display

Toughened glass for harsh conditions and a customized outdoor display delivers easy readability in direct sunlight, no matter how bright the conditions are.

Dedicated SOS button

The XT-PRO DUAL has a dedicated SOS button, which is easy to use in times of distress. Even when the phone is switched off, simply press and hold the SOS button for three seconds. This starts the handset and triggers the emergency service call (and/or SMS) to any pre-programmed number.

Rugged design

The XT-PRO DUAL is water and dust resistant as well as shockproof to withstand harsh environments.

Supported by the most robust and powerful satellite network

Thuraya's system is renowned for having the most reliable satellite network, and the advanced omni-directional antenna of the XT-PRO DUAL ensures uninterrupted signals when walking or moving, offering full walk-and-talk capability.

Incoming call notifications in satellite mode

The call notification function operates in satellite mode even if your satellite signal is too weak to receive the call itself. This is particularly useful when your phone is in your pocket with the antenna stowed, keeping you connected at all times.

Geofencing on Thuraya XT-PRO DUAL

Moving along the blue line - No Tracking

Moving along the green line - Tracking

Advanced navigation features for your safety

The navigation feature on your XT-PRO DUAL is a powerful and flexible tool that allows you to use location information in various ways. Find your current coordinates and send them to other people, enter waypoints to navigate to a specific position using the electronic compass, or use position logging on the phone.

The phone also has advanced tracking capabilities with three different options, based on preset time intervals, distance travelled and detection of movement outside the preset geofence of your choice.

Geofencing

It is easy to choose the size and location of your geofence. Simply enter between three and seven coordinates, which can be set around any building, city or country – in fact, around any chosen area.

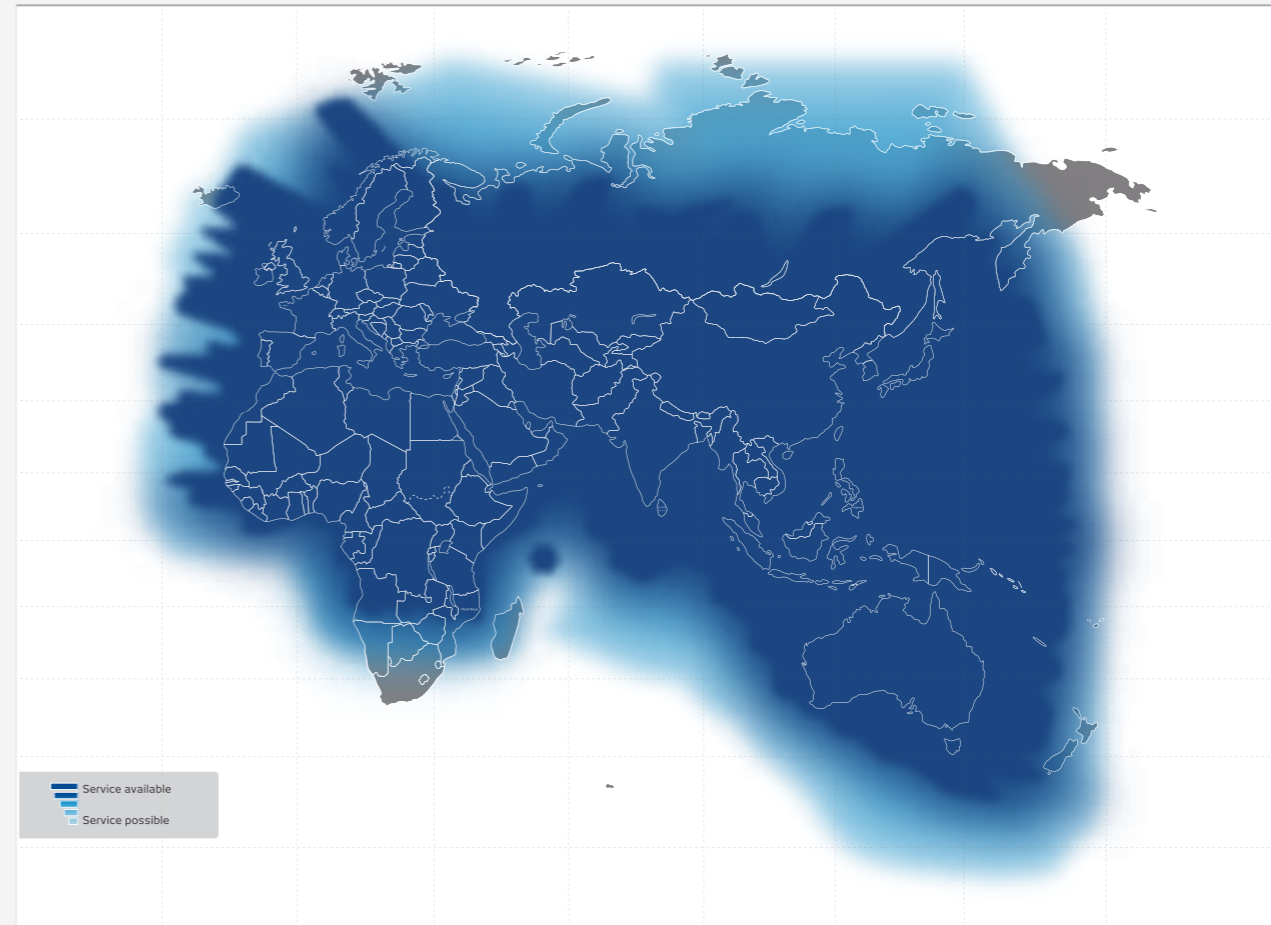

For full and secure control, all tracking functions on the XT-PRO DUAL are always user activated and cannot be initiated or controlled by any unwelcome external entity.

Thuraya's coverage area

Thuraya's reliable and uninterrupted satellite network allows you to stay connected via satellite mode anywhere across its coverage area over Europe, Africa, Asia and Australia. In satellite mode the Thuraya XT-PRO DUAL works with a Thuraya SIM card and with a GSM SIM card from any of the 380+ Thuraya roaming partners worldwide. In GSM-mode the phone supports most 2G/3G frequencies across the world.

Wherever your mission or business operations take you, the Thuraya XT-PRO DUAL provides the reassurance of constant, reliable communications even in the most challenging environments and remote locations.

Thuraya XT-PRO DUAL connects you, no matter where you are.

Available accessories

Fixed Docking Units (FDU)

The Fixed Docking Units allow you to dock your XT-PRO DUAL and use it as a desktop phone for Thuraya satellite services indoors.

Vehicle Dockers

A vehicle dock ensures reliable hands-free satellite services when on the move.

Indoor Repeaters

Indoor repeaters use an indoor antenna to transmit Thuraya satellite services inside buildings.

Solar Chargers

A solar charger can be used to charge the XT-PRO DUAL, removing the need for access to electricity.

Additional accessories include:

-  Wrist Straps
-  Spare Car Chargers
-  Spare Batteries
-  Spare Travel Chargers
-  Spare USB Data Cables
